**REQUIRED
AdvanceED**

Descriptor Code: FFA

All drug/alcohol testing shall be performed in accordance with federal law on Transportation Workplace Drug Testing. This language in no way authorizes random drug testing in district schools as part of the curricular program.

Disciplinary sanctions will be imposed on, and additional actions may be taken (as listed below) in response to, any violation of this policy. These sanctions may include suspension or expulsion, intervention (as described below), and notification of proper authorities for prosecution. Prohibited substances will be confiscated and illegal substances will be turned over to law enforcement authorities.

Intervention

It is acknowledged that the public school has neither the authority nor the responsibility to make medical or health determinations regarding chemical dependency; however, when observed behavior indicates that a problem exists that may affect the student's ability to learn or the educational climate of the school, the school has a right and a responsibility to refer the student for a formal chemical dependency diagnosis. The Superintendent shall develop a procedure for chemical dependency identification and referral for treatment.

Referral for treatment shall be a constructive not punitive action; however, use of the treatment program shall not override or prohibit the District from taking disciplinary action for violations of this policy.

The school will make a reasonable effort to cooperate with a therapy program if one is recommended for the student. The Board believes that if a student is involved in a chemical dependency program and is successfully addressing their harmful involvement with chemicals, they may be allowed to continue in the regular school setting and continue to participate in any extracurricular program unless participation is in conflict with rules and regulations set forth by the Board, the [North Dakota High School Activities Association](#), and/or the student has been suspended or expelled as a result of a district policy violation.

The school may, through the use of available resources, provide follow-up counseling and supportive assistance to those students who return after successfully completing a therapeutic regimen, realizing that the student may need assistance in dealing with other environmental factors beyond the school's control which may remain unchanged.

Confidentiality

The District shall maintain the confidentiality of students referred for counseling and chemical dependency treatment in accordance with the district's policy on counseling records and other applicable law.

Education

The District will teach about drugs and alcohol in an age appropriate developmentally based education and prevention program in every grade in accordance with law. This program will include information about drug and alcohol counseling and rehabilitation programs available to the students.

In addition, the District will conduct staff orientation and training on drug and alcohol prevention, including a periodic overview of this policy and its procedures for implementation. The District will also provide parent and community education on the topic of drug and alcohol prevention.

Policy Implementation

Student handbooks shall contain a statement of sanctions required concerning the possession, use, or distribution of drugs and/or alcohol.

The Apple Creek School District will review this policy and its implementation periodically to ensure that disciplinary sanctions are consistently applied and to determine the effectiveness of the program for the prevention of alcohol and other drug use/abuse.

The Principal will annually conduct inservice training sessions for school district employees, which will include a review of this policy and procedures for implementation thereof. In the event an employee is unable to attend such inservice sessions, the administrator will cause this policy to be individually reviewed with such employee.

The Principal will maintain a list of all employees with whom this policy has been reviewed, whether individually or through inservice training, along with the dates of such review or training.

In addition, student handbooks will be used to inform students that the use of alcohol and other drugs is wrong and harmful and is not permissible. Students, employees and parents will be given a copy of the standards of conduct and the statement of sanctions required concerning the possession, use or distribution of illicit drugs and alcohol. Compliance with these standards of conduct is mandatory. The handbook will include a form for parents to sign and return indicating that the information in the handbook has been received and read by the student and the parents. Each principal will maintain a file of returned forms.
